

forsøket, kan henvende seg direkte til avlsrådet og til faggruppa som jobber med RAS. De vil da bli satt opp på ei liste over aktuelle samarbeidspartnere for krysningsforsøket. *Et samarbeid vil innebære at man er forvert eller oppdretter av en eller flere kryssninger, og samtidig følger lojalt de anbefalinger*

*som avlsrådet og faggruppa gir i forbindelse med RAS.* Det er mulig for alle interesserte, også fra andre land, å sette seg på denne lista, men vi lover ikke at alle som står der, blir med på den første fasen av forsøket. Formålet nå er å kartlegge hvor mange oppdrettere vi har som kan tenke seg å bidra i praksis til dette arbeidet.

# Plans for the work with RAS in 2013

Text:

Ingvild Svorkmo Espelien, Hanna Gautun og Turid Helfjord

After the meeting at Starum, the RAS working group will write the strategy as agreed on the workshop. The RAS will be presented at an open meeting for members and others who are interested in Trondheim the 7th of July 2013. After this meeting, the final version of RAS will be written and the board of NLK will send it to NKK.

Before the meeting in July, the Breeding Council and the RAS group will meet and

discuss RAS. We will put up a list of possibly 10-20 breeds that might be suitable for crossing. The list will then be discussed with NordGen and NKK before the board concludes concerning the choice of the breed for crossing.

The crossbreeding experiment will be conducted as a cooperation between the NordGen scientists and the breeders who wish to participate. Not ALL breeders

wish to participate, and NLK wish to point out that it is NOT necessary to participate. Those who do not wish to participate, will continue to breed pure bred Lundehunds, as this is very important for the future of the breed. No decision has been taken about who will participate in the experiment, and it has not been decided whether breeders from other countries may participate in the early stages of the experiment or not.

It is important for NLK to cooperate with the breeders and breed clubs/organizations in other countries. At Starum, representatives from the other Nordic clubs and organizations were represented and agreed on the strategy. The cooperation between the Nordic countries has been good for many years, and the agreement at Starum promises an even better Nordic cooperation in the future.

NLK also invite to a closer cooperation with the breed clubs and organizations outside the Nordic countries.

### **A list of breeders who wish to cooperate in the crossbreeding**

Breeders who are interested to participate in the crossbreeding experiment may contact the Norwegian breeding council. We will make a list over these breeders. *A cooperation will mean that the breeder will agree to take a crossbred dog in care, or crossbreed, while loyal to the recommendations from the Breeding Council and the RAS Group.* Anyone from any country may put himself/herself on the list, but not everyone on the list will be guaranteed to participate in the experiment. The aim of the list is to learn how many that will be willing to work on the project in practical terms.

### ***Husk påmelding til Lundespesialen 6. juli i Melhus!***

Ordinær påmeldingsfrist: 1. juni

Forlenget frist: 11. juni
